

EXPANDING FOAM

GSA Expanding Foam is a High Expansion polyurethane foam for general purpose applications in mounting, filling, sealing, insulating and sound proofing in concrete, plaster, brick, floorboards, most plastics, metal, glass, or wood.

- Insulated • High Expansion • Fixing Filling

GSA Fixing Foam is a fast cure and low expansion polyurethane foam adhesive for fixing plasterboards and the following insulation boards – extruded polystyrene boards (XPS); expanded polystyrene board (EPS); wood fiber boards; cork insulation boards; and bituminous felt faced PUR/PIR boards.

- High Adhesion • Low Expansion • Fast Cure

GSA Fire Foam GSA Fire Foam is a one component fire retardant isolation and construction foam developed to make a fire retardant seal between construction parts. Flame resistant only between solid mineral or metal construction materials.

- Tested to AS1530.4 • Isolates • Protects

Polyurethane foam is one of the most versatile insulating materials that we know. Polyurethane foam or PU foam has many applications such as gap filling, thermal insulation, sound insulation, bonding and passive fire protection. GSA has an extensive range of foams manufactured to world class standards.

- STRAW APPLICATOR GRADE • LOW EXPANSION GRADE • GUN GRADE
